Column and Row references

The image shows the Microsoft Excel interface. The ribbon at the top includes tabs for File, Home, Insert, Page Layout, Formulas, Data, Review, View, Developer, and Power Pivot. The Home tab is active, showing groups for Clipboard, Font, Alignment, and Number. Below the ribbon, the formula bar shows 'A1'. The grid below has columns labeled A through K and rows numbered 1 through 12. Two callout boxes are present: one labeled 'Columns' pointing to the column headers, and another labeled 'Rows' pointing to the row numbers.

Columns
Columns are referred to with letters

Rows
Rows are referred to with numbers

Column and Row references

The screenshot displays the Microsoft Excel interface. The ribbon at the top includes tabs for File, Home, Insert, Page Layout, Formulas, Data, Review, View, Developer, and Power Pivot. The 'Home' tab is active, showing groups for Clipboard (Cut, Copy, Paste, Format Painter), Font (Calibri, size 11, bold, italic, underline, text color, background color), Alignment (left, center, right, justify, wrap text, merge & center), and Number (general, percentage, currency, date, time, text, scientific). The worksheet grid shows columns A through K and rows 1 through 12. Cell A1 is highlighted with a blue border. A blue callout box points to cell A1 with the text 'A1'. A dark blue text box explains that A1 refers to the cell at the intersection of column A and row 1.

A1

For example A1 refers to the cell at the intersection of column A and row 1

The screenshot shows the Microsoft Excel interface. The ribbon is set to 'Home'. The Name box, located at the top left of the worksheet area, displays 'C5'. A blue callout box points to the Name box with the text: 'Name box Displays the cell reference of the active cell (the one we have clicked on)'. The active cell is C5, which contains the formula '=BS!C9'. The worksheet contains a table with financial data. The first part of the table is under the heading '\$ in thousands' and lists 'Working capital' components. The second part of the table lists 'DSO', 'DIO', and 'DPO' values. A blue callout box points to the 'Working capital' row with the text: 'Later... We will see how to assign names to cell ranges using the name box'.

		FY14	FY15	FY16	FY17	FY18
		Forecast	Forecast	Forecast	Forecast	Forecast
Inventory	31,167	36,397	46,212	51,457	55,533	59,932
Trade receivables	32,884	38,556	43,582	47,034	59,120	63,804
Trade payable	15,891	26,352	36,190	40,297		
Working capital	48,160	48,601	53,604	58,194	62,804

DPO	40	63	83	83	83	83

The screenshot shows the Microsoft Excel interface. The title bar at the top reads "DCF Valuation - Excel". The ribbon includes tabs for File, Home, Insert, Page Layout, Formulas, Data, Review, View, Developer, Power Pivot, and Tell me what. The Home tab is active, showing options for Clipboard (Cut, Copy, Paste, Format Painter), Font (Arial, size 9, bold, italic, underline, color, background color), Alignment (text alignment, merge & center), and Number (currency, percentage, decimal places, thousands separator). The Formula bar is located below the ribbon, showing the active cell "C5" and the formula "=BS!C9". A blue callout box points to the Formula bar with the text "Formula bar" and "We use the formula bar in order to type or edit formulas in the cells of our spreadsheet". Below the Formula bar, a spreadsheet is visible with columns A through G. The data is organized into a table with rows for "Working capital" and "Inventory", "Trade receivables", "Trade payable", "Working capital", "DSO", "DIO", and "DPO". The values are presented in a grid format with headers for "FY11 Actual", "FY12 Actual", "FY13 Actual", "FY14 Forecast", "FY15 Forecast", "FY16 Forecast", "FY17 Forecast", and "FY18 Forecast".

Spreadsheets

By right clicking on a worksheet, several formatting options become available:

The screenshot shows a bar chart with data series for FY14, FY15, FY16, and FY17. A right-click context menu is open over the chart, displaying various options. Callouts point to specific menu items:

- Delete the worksheet
- Change the name of the worksheet
- Move or Copy the worksheet
- Change its color

The context menu options include:

- Insert...
- Delete
- Rename
- Move or Copy...
- View Code
- Protect Sheet...
- Tab Color
- Hide
- Unhide...
- Select All Sheets

The 'Tab Color' option is highlighted, and a 'Theme Colors' palette is visible on the right side of the menu.

Adjusting the size of a column/row manually

Size of a Column/Row

In order to adjust the size of a column (or a row) manually, click with the left button of the mouse at the beginning of the column (row) as shown above (below). You can adjust its size by dragging the it

Adjusting the size of a column automatically

	Country A	Country B	Country C	Country D
Gold Medals	8	2	1	2
Silver Medals	2	4	6	8
Bronze Medals	1	4	2	4
Total	11	10	9	14

If the content of some of the cells within a column does not fit its size (as shown above), you can do the following:

	Country A	Country B	Country C	Country D
Gold Medals	8	2	1	2
Silver Medals	2	4	6	8
Bronze Medals	1	4	2	4
Total	11	10	9	14

Double-click with the left mouse button and adjust the column's size

	Country A	Country B	Country C	Country D
Gold Medals	8	2	1	2
Silver Medals	2	4	6	8
Bronze Medals	1	4	2	4
Total	11	10	9	14

The column would automatically fit the cells' size

Explore the Ribbon Tabs: Home

Home Tab

The Home tab contains some of the most frequently used properties. It includes buttons such as Cut, Copy and Paste which can transfer text, data or objects within your files. Most of the formatting options are included here as well. You will find features such as Font, Font Size, Borders of cells, Text color, Alignment etc. Within the Home tab, we can find also the “Find & Select” tool, which is very useful in certain situations

Explore the Ribbon Tabs: Insert

Explore the Ribbon Tabs: Page Layout

Explore the Ribbon Tabs: Formulas

365  Careers

Explore the Ribbon Tabs: Data

Data Tab

This is where we can find the commands for working with lists and groups of data. Here we have a number of useful applications such as “Remove Duplicates”, “Text to Columns”, “Data Validation”, “What-if analysis” – all of which we will see in detail later in this course. This is also where we find some of the common data management tools such as cell grouping and data sorting

Explore the Ribbon Tabs: Review

Review Tab

This tab furnishes the instruments which allow you to proofread your Excel files. In addition to that, it enables some protection options as well

Explore the Ribbon Tabs: View

View Tab

The View Tab allows you to customize the way you see your spreadsheet: you can select among different Workbook View options, Zoom options etc.

Explore the Ribbon Tabs: Developer

Right-click on a cell

Right-click on a cell

A number of options are available when you right-click on a cell. You can copy its content, paste the content of a previously copied cell, shift its position (insert or delete), format the cell etc.

The screenshot displays the Excel interface with the 'Developer' tab selected. A right-click context menu is open over cell D5, which contains the formula `=P&L!D11`. The menu options include: Cut, Copy, Paste Options, Paste Special..., Smart Lookup, Insert..., Delete..., Clear Contents, Quick Analysis, Filter, Sort, Insert Comment, Format Cells..., and Pick From Drop-down List... The background shows a financial model with a table of Revenues and EBITDA development and a corresponding bar chart.

	FY11 Actual	FY12 Actual	FY13 Actual	FY14 Forecast	FY15 Forecast	FY16 Forecast	FY17 Forecast	FY18 Forecast
Revenues	177,203	188,618	208,366	224,872	242,686	261,910	282,658	305,049
EBITDA	20,317	21,234	22,151	23,068	30,494	32,705	35,091	37,666

USD in thousand

Historical figures

Forecast period

EBITDA%

The screenshot shows the Excel Developer tab with the 'Format Cells' dialog box open. The 'Number' tab is selected, showing various categories like General, Number, Currency, Accounting, Date, Time, Percentage, Fraction, Scientific, Text, Special, and Custom. The 'Custom' category is selected, and the 'Type' field shows the format code '0.0%'. The 'Sample' field shows '21,214'. The 'Delete' button is visible. The background shows a spreadsheet with columns A through H and rows 1 through 27. The 'Revenues and EBITDA' section is visible, with values in thousands of USD. The 'DCF valuation' section is also visible, with values for FY17 Forecast and FY18 Forecast.

Format Cells

Within the Format Cells menu, we can select from a variety of formatting options. In the first tab "Number", we can change the appearance of a number without changing the number itself. We can select whether to represent a certain number as a number, currency, text, date, assign a custom formatting etc. In the other tabs we can find options regarding the alignment, font, borders and the fill of the selected cell/cells. We will see many practical examples of how the Format Cells menu is used, throughout the course

FY11-FY18: Working capital development

Creating an Excel formula

	A	B	C	D	E	F	G	H	I	J	K	L
1		Working capital										
2												
3			FY11	FY12	FY13		FY14	FY15	FY16	FY17	FY18	
		\$ in thousands	Actual	Actual	Actual		Forecast	Forecast	Forecast	Forecast	Forecast	
4		Inventory	31,167	36,397	46,212		51,457	55,533	59,932	64,679	69,803	
5		Trade receivables	32,884	38,556	43,582		47,034	50,760	54,781	59,120	63,804	
6		Trade payable	15,891					43,489	46,934	50,652	54,664	
7		Working capital	48,160							73,148	78,943	

Create an Excel formula

Type equal ("="), select the cells for which you would like to carry out the operations, and introduce the necessary operators (in this example "+")

Type "=" or "+" at the beginning of your formula. By doing this, Excel understands that you would like to create a formula and not just type text

Copying of cells

The screenshot shows an Excel spreadsheet with columns I through U. A table of financial data is visible in the upper left, and a bar chart is in the lower left. A context menu is open over cell O, with the 'Paste' section highlighted by a blue oval. The 'Paste' section includes icons for various paste options: a clipboard, a clipboard with a number (123), a clipboard with a formula (fx), a clipboard with a link, a clipboard with a percentage (%), and a clipboard with a currency symbol (\$). Below the icons is the 'Paste Special...' option. A blue callout box with the word 'Paste' is positioned over the menu, containing text explaining the paste function. The bottom of the screen shows the 'Working capital' and 'DCF results' tabs.

Cut (Ctrl + X)

Forecast

Cut allows you to move a cell's content from one location to another. You need to select the Cut command as shown here, or use the "Ctrl + X" shortcut (preferred). Once you do that, you can paste the cell's content in another cell (C10 in the example to the right). As you can see, the content of the cell which was in C7 transferred to C10

The screenshot shows the Excel ribbon with tabs N, O, P, Q, R. The 'Cut' command is highlighted in the 'Paste' group. Below the ribbon, a context menu is shown with 'Cut', 'Copy', and 'Paste Options'.

Undo & Redo

The Undo feature of Excel allows you to quickly correct mistakes. On the other hand, the Redo button lets you Redo what has been previously Undone. It is worth memorizing the shortcuts for the two commands: Undo ("Ctrl + Z") and Redo ("Ctrl + Y")

Select an area of cells

The screenshot shows the Microsoft Excel interface with the 'Home' tab selected. The ribbon includes options for Clipboard, Font, Alignment, and Number. The active cell is D4, and the formula bar shows the value 'a'. A range of cells from D4 to F6 is selected, containing the following data:

	A	B	C	D	E	F	G	H	I	J	K	L
1												
2												
3												
4				a	b	c						
5				d	e	f						
6				g	h	i						
7												
8												
9												
10												
11												
12												
13												
14												
15												
16												
17												
18												
19												
20												
21												
22												

Select cells (Shift + Arrow key)

You can easily select cells by pressing shift and navigating with the arrow keys through the cells of the spreadsheet
